

Living with Urinary Incontinence? It is a Condition You Can Change

The Continence Center at Virginia Mason Medical Center

SEATTLE, WASHINGTON

When it comes to incontinence, it's time to separate fact from fiction. The fact is that urine leakage, or incontinence, is a very common problem with very effective solutions — and the idea that incontinence is something you just have to live with is pure fiction.

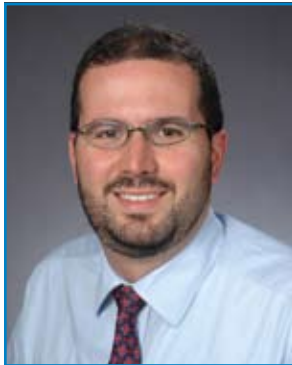

“Contrary to popular belief, there are a lot of very successful treatments for urinary incontinence,” says urologist and Co-Director of the Continence Center at Virginia Mason Kathleen Kobashi, M.D. “The result of nor-

mal childbirth, hormonal changes or simple time and gravity, urinary incontinence affects over 13 million Americans, most of whom are women. For the vast majority, we can reduce or completely eliminate the problem.”
