

Simmons Cancer Institute at Southern Illinois University

Raising the Standard for Advanced, Multidisciplinary Cancer Care

There is a place nearby where cancer patients can receive the most up-to-date oncology care and families can come together to heal.

A unique facility that integrates sophisticated, academic research together with multidisciplinary patient care, Simmons Cancer Institute at Southern Illinois University in Springfield provides the communities of central and southern Illinois with innovative medical treatments, compassionate support services, education, outreach and cutting-edge clinical research.

Care at Simmons Cancer Institute is so advanced that the choice is clear: if you or a loved one has received a diagnosis of cancer, you can receive the world-class medical attention you need.

“The new Simmons Cancer Institute at SIU is a perfect blend of modern science and hope for people who have been diagnosed with cancer.”

– K. Thomas Robbins, M.D.,
Professor of Otolaryngology–Head & Neck Surgery and Director of Simmons Cancer Institute at SIU

Some of the physicians and staff at Simmons Cancer Institute at SIU in Springfield, Illinois.

Advanced Care at SCI:

- Brand new, state-of-the-art facility designed to provide comprehensive care in a single, convenient location
- A multidisciplinary approach using more than a dozen cancer care teams
- On-site American Cancer Society patient navigator to address complex cancer care issues
- On-site chemotherapy administered in a patient-friendly environment
- Research in genetics, early detection, experimental therapeutics and prevention
- National Institutes of Health funded clinical trials including access to the latest therapies through Phase 2 studies
- Specialized nursing staff recognized by the Oncology Nursing Society
- Side-by-Side Wellness Center to address the emotional, physical, social and spiritual being of patients and their caregivers
- Disease-specific support groups for patients to share experiences
- Outreach programs to promote education and screenings
- Partnerships with regional healthcare facilities to minimize patient travel
